

Project description

For NL-architects we realized a fence around a pumping station on a sports park in Rotterdam, the Netherlands. The photography of Muybridge was used to convert a static fence into a dynamic object, matching the sports theme. A perpetual motion machine of 100 running men.

Photography: Kees Hummel

Product information

Product: Dedots

Application: Enclosure

Function: Sports park

Type: Chainlink mesh

Material / coating: PC-ASA

Pattern: Custom

Colour: 9

Dot Density: 100%

Mounting: CL1

Project size: 297 m2
