

Project description

Large sized apartment building facade project. The concept for this housing project was a symbolic reference to a nest in a tree. In close collaboration with the architect we designed a pattern that gives the feeling you are looking through the canopy of leaves. People feel they are living in an artpiece and the audience is inspired by the unique character of the building. It becomes a recognizable landmark.

Product information

Product: Lalace

Application: Facade

Function: Apartment walkway

Type: Bended

Material / coating: Stainless Steel PVC coated

Pattern: Leaves (#06)

Colour: White

Pattern ratio: 40/60

Mounting: Binding cables

Project size: 896 m2
