

Project description

The architect of a new building complex in Brooklyn asked us to design a screen that will act as fall-through protection for the roof terrace. We also aimed to complement the building's volume. On the outside the DOTS are black, and on the inside the DOTS are provided with a chrome finish.

Product information

Product: Dedots

Application: Facade

Function: Appartment balcony

Type: Chainlink mesh

Material / coating: PC-ASA

Pattern: Custom

Colour: 1

Dot Density: 21%

Mounting: CL2

Project size: 231 m2
