

Project description

Nestled in between two four-storey buildings, Hackney House's red cubic design definitely catches the eye. The unusual wire-frame façade befits its hip Shoreditch location and suits the pop-up spaces main aim – to showcase all that is cool and relevant about Hackney and east London. The space will host events throughout the period of the Olympics and Paralympics while off ering a home to the world's visiting media.

Product information

Product: Lalace

Application: Enclosure

Function: Olympics media center

Type: Bended

Material / coating: Stainless Steel

Pattern: Custom Britisch

Colour: Stainless Steel

Pattern ratio: 70/30

Mounting: Binding wire

Project size: 30 m2
