

Project description

AVE Santa Clara building, an eight-story residential mid-rise with over three hundred homes including a parking garage, down the street from Levi's Stadium. The open parking façade is covered with a Dedots screen, an artwork created in collaboration with a local artist Roan Victor. In her words: "It makes me smile to know that I get to show you these giant, larger than life scrub jays hanging out around the silhouette of a grand Coast Live Oak tree. I always relish these opportunities to share something about our California native flora and fauna."

Artist: Roan Victor

Product information

Product: Dedots

Application: Facade

Type: Bended mesh panels

Material / coating: PCA/ASA caps, PVC coated chainlink mesh

Pattern: Custom Birds & tree

Colour: 19 colors

Dot Density: 70%

Mounting: Cables and winding wire

Project size: 475 m2
