

Project description

For a German client we designed a colorful balustrade for the stairwell. The slight color gradient from orange to yellow is executed in two densities. 100% density of the rear parts and 40% density of the front parts. The transparency of the front parts ensures the subtle interaction of the colors with their surroundings.

Product information

Product: Dedots

Application: Railing

Function: Courtyard

Type: Welded mesh

Material / coating: PC-ASA

Pattern: Custom

Colour: 12

Dot Density: 68%

Mounting: WD2

Project size: 69 m2
