

Project description

The outdoor parking openings are covered with Lalace, turning them into ponds with lotus flowers while ensuring safety. The diversity of homes reflects Amsterdam's population. Together with FLUX Landscape, a sloping hill with greenery covers the parking garage. On the ground floor, a large communal and educational space connects directly to the park, fostering community between residents and the neighborhood.

Architect: OZArchitects

Photography: Kees Hummel

Product information

Product: Lalace

Application: Net

Type: Welded mesh panels

Material / coating: SS304 Powdercoated

Pattern: Lotus leaves

Colour: White

Dot Density: 70%

Mounting: Flanges with M12 bolts

Project size: 90 m2
