

Project description

For a baseball club north from Moscow, we designed a fence that not only separates the sports complex from its surroundings, but also presents the club's activity and star players to the world. The 40x40mm mesh size of the base carrier prevents the fence from being climbed.

Product information

Product: Dedots

Application: Enclosure

Function: Sports park

Type: Chainlink mesh

Material / coating: PC-ASA

Pattern: Custom

Colour: 16

Dot Density: 15%

Mounting: CL2

Project size: 754 m2
