

Project description

For the lobby of the 5-star SiR Victor hotel in Barcelona we produced 265.000 copper Dots on welded mesh panels. By means of the special Dedots mounting clips the panels connect seamlessly to each other, creating an infinite surface of Dots. The Dots have the required fire class, improve the acoustics and conceal the installations behind.

Product information

Product: Dedots

Application: Wall

Function: Hotel

Type: Welded mesh

Material / coating: PA-FR

Pattern: Custom

Colour: 1

Dot Density: 100%

Mounting: WD1

Project size: 322 m2
